Terraces

Fillings:

- press welded grating
- perforated planks
- without surface

Railings:

- industrial balustrade
- children safe balustrade

Dimensions:

- 2440×6055 mm

Terraces

The main purpose of container terraces is to extend the usable floor area according to individual needs of a client. Terraces can be assembled on any standard container. Choosing the right railing as well as terrace floor is usually imposed by the law. For both railing and terrace fulfillment TLC offers a standard solution or bespoke project. The entry to the terrace is possible thanks to the standard container stairs which can be assembled both inside and outside the container.

Terrace with stairs inside the container type I

Terrace with stairs inside the container type II

Terrace with stairs outside the container

Terrace with stairs outside the container in a mirrored configuration

Terrace on multiple containers with stairs outside the container

Terrace with stairs on short side of the container
