

City ECO Light

crowd control barriers

- + High quality of solderweld – maintaining high stability and durability
- + Quick setup, hassle-free dismantling thanks to fixed legs and hooks
- + Implementing a dedicated production line for the CITY Eco Light barrier showcases modern serial production - merging automation, ecology, ergonomics, and process optimization into one efficient system

Index	P-OT-CGR-2,3
Dimensions [mm]	2260×1125
Design [mm]	Steel tubes 28×1
Filling [mm]	Steel tubes 14×1
Weight [kg]	9,2

- + The special production process ensures corrosion resistance and durability acc. to EN ISO 12944-2 standard
- + The unique, eco-friendly production process ensures consistent quality for each element
- + Barrier length: 2.3 m – optimized for container logistics (fits across a standard shipping container), which results in significantly lower transport costs and easier storage
- + The new design was adapted for quick assembly on construction sites
