

# City ECO Light

## crowd control barriers

- + High-quality workmanship of welds, joints, and details
- + Optimal length of the barrier: 2.3 m – significantly reduces logistics costs
- + More convenient for transportation and on-site assembly
- + Durability and corrosion protection
- + Faster order fulfillment time

The CITY Eco Light barrier has a 2.3 m length that **optimizes container logistics** and reduces transport costs. The design ensures quick assembly, high stability, and durability.

It combines automation, eco-friendly production, and **C3-class corrosion resistance** (acc. to PN EN ISO 12944-2).

Index	P-OT-CGR-2,3
Dimensions [mm]	2260×1125
Design [mm]	Steel tubes 28×1
Filling [mm]	Steel tubes 14×1
Weight [kg]	9,5
