

Steel custom projects

for
machinery
park and
tanks

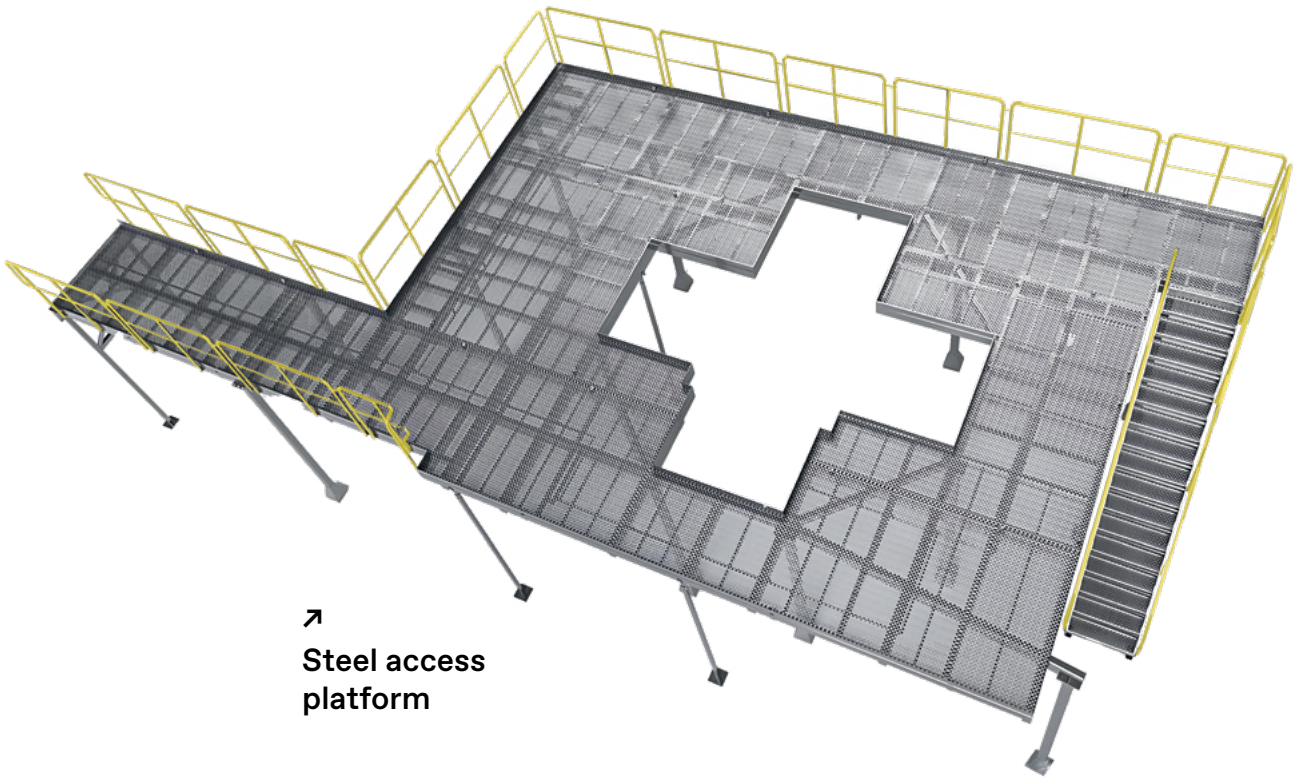

A 3D rendering of a multi-level industrial steel access platform. The platform is constructed from grey metal grating and is supported by a network of vertical steel columns. It features a central control room with a double door and windows. A set of stairs with yellow handrails leads up to the platform. The surrounding area includes various pipes, railings, and safety bollards. The floor is marked with yellow diagonal stripes.

Our quality:

We ensure that all of our products are of the highest quality by complying with Factory Manufacture Control certification EN 1090-1:2009+A1:2011, issued by TÜV.

Our processes are certified under an Integrated Quality, Environment, and Health and Safety Management System, issued by Bureau Veritas Certification according to ISO 9001/ ISO 14001/ ISO 45001.

Our products have Environmental Product Declarations (EPDs) - the global Type III declaration programme that follows the principles of ISO 14025.

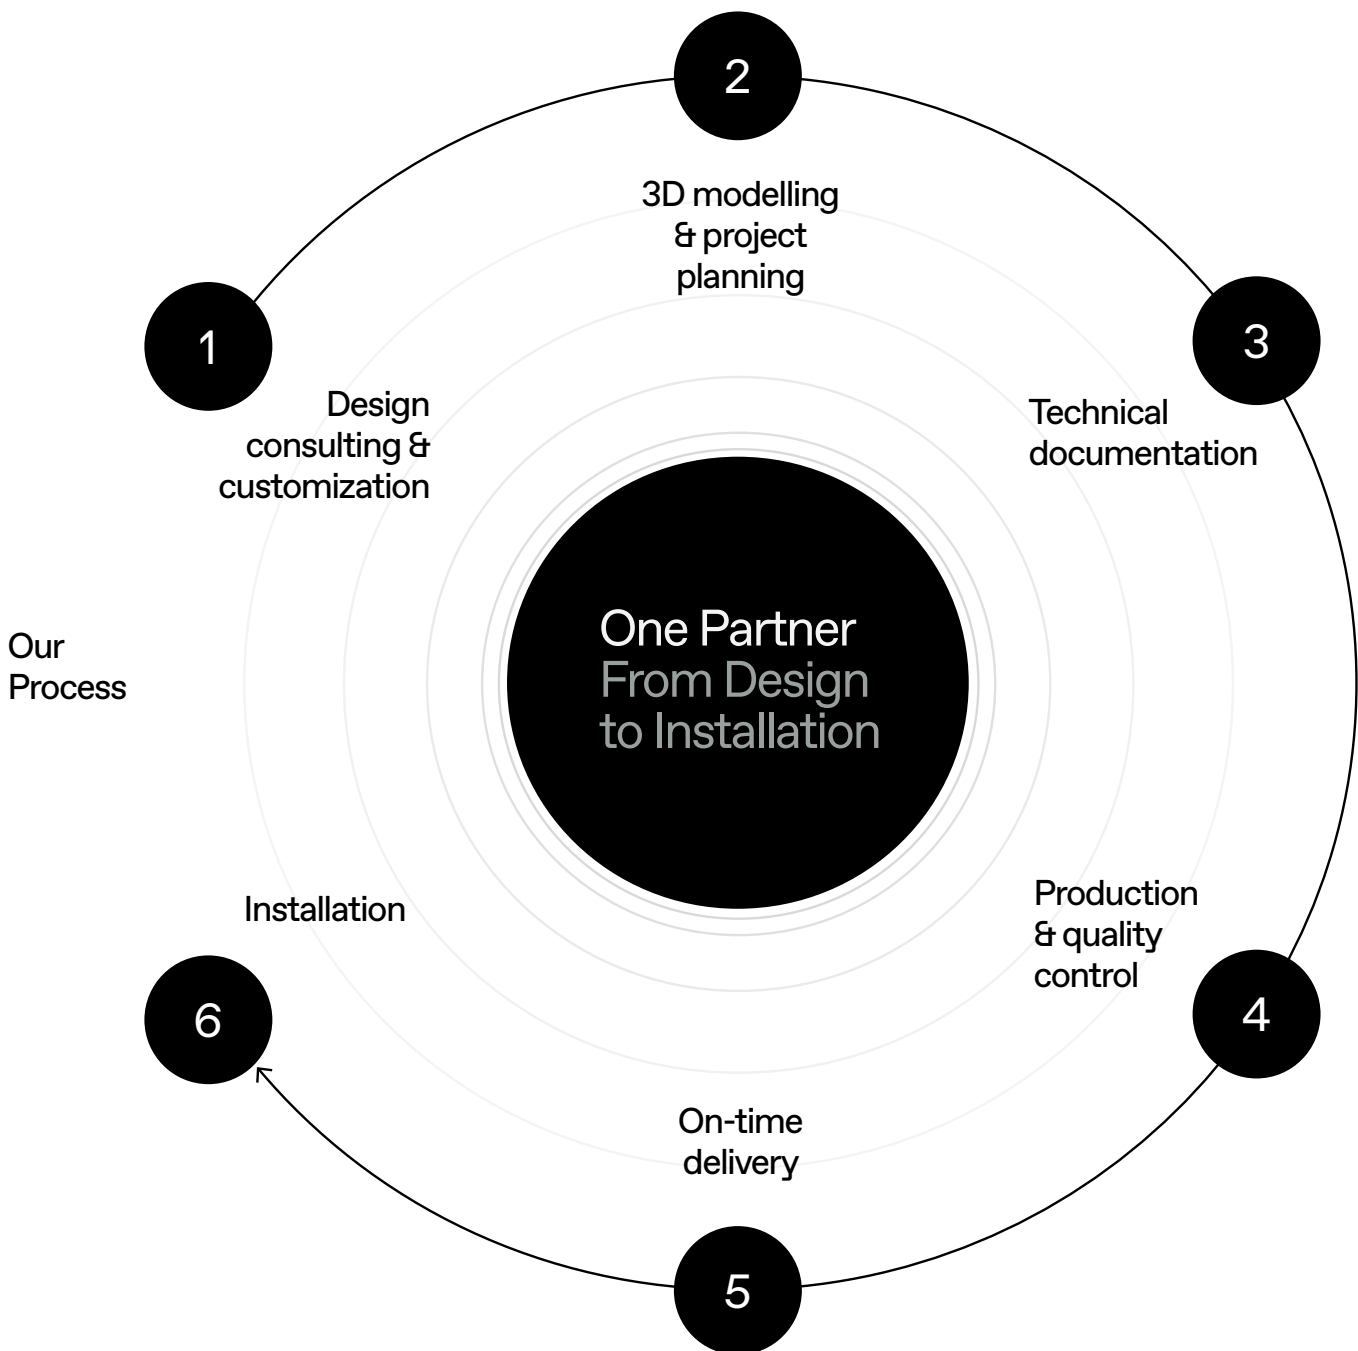

CPR

Our construction products meet the requirements of the European Directive 305/2011 (CPR) for structural steel and aluminium. Some of the TLC products are CE-marked.

EXC3

Certified up to EXC3 under EN 1090, with continuous quality and FPC supervision — delivering reliable, high-performance structures.

One Partner. Full Process. Complete Control

Why should you
work with TLC?

From design desk to final bolt – we've got it covered.

Comprehensive scope — from design to installation

We offer custom steel solutions, including design, production, delivery, and installation. This **all-in-one approach** eliminates coordination issues and prevents additional costs later in the project.

Proven technical quality

Compliance with the highest global standards, precise material specifications, and a certified supply chain. Guaranteed quality, safety, and reliability.

Trusted project partner

We approach every project with exceptional precision and care, ensuring success through professionalism and a long-term partnership mindset.

Driven by full reliability

We take full responsibility for execution, including installation. This ensures efficient project management and prevents costly delays.

Controlled budgets, measurable performance

We integrate design, production, and execution into a single, managed process — reducing uncertainty, ensuring measurable project outcomes, enabling predictable budgeting, and simplifying coordination.

With TLC, you gain
peace of mind — and
measurable value.
